

BASWARE INVOICE AUTOMATION FOR PEOPLESOFT

Leverage your investment in PeopleSoft Enterprise Applications with Basware Invoice Automation

Basware Invoice Automation solutions for PeopleSoft provide a best-of-breed approach to Accounts Payable (AP), seamlessly interfacing with other PeopleSoft financial and distribution applications such as General Ledger, Purchasing and AP.

Basware Invoice Automation for PeopleSoft is a suite of off-the-shelf invoice processing and matching solutions. Built-in best practices help you improve business performance, reduce costs and increase control. The entire invoice handling process can be automated through paper and e-invoice data capture, matching purchase orders with invoices, recurring invoice matching, review and approval workflows, and transfer for payment.

Basware interfaces with PeopleSoft Procurement Applications as well as any other purchasing systems you may have in your organization. Consolidating purchase order data from PeopleSoft, Oracle, JDE, SAP, Lawson and over 200 other backend systems allows Basware users to achieve 'best-in-class' matching rates.

Achieve real time visibility of invoice handling

With Basware, you can monitor every step of your organization's invoice handling process. Our solutions help you better manage cash flow, ensure compliance with legislation and gain control over the entire process.

Benefits from day one

Built-in exception handling cuts the time, costs and errors associated with manual processing. Increased data accuracy and faster business processes enable companies to realize significant cost savings.

Leverage AP as strategic function

Elevate the AP department to a strategic function through an improved AP process and visibility organization-wide that provide immediate, real-time business value and analysis to manage cash more strategically.

Key Benefits

Business performance

- Eliminates time-consuming invoice handling tasks
- Eliminates manual matching of invoices
- Minimizes manual data entry errors
- Accelerates the invoice approval process
- Enables fast and practical analysis and reporting
- Allows invoice review and approval 24/7
- Enables continuous process improvement
- Allows supplier self-service

Compliance and control

- Complies with legislative requirements
- Provides a complete audit trail
- Ensures maximum control with approval-rights management
- Enables easy forecast of invoice-related payments
- Provides a high level of transparency throughout the process

Savings and return on existing IT investments

- Delivers ROI in less than nine months
- Generates savings from process improvements
- Improves supplier visibility, discounts, and penalty avoidance
- Streamlines your existing PeopleSoft processes
- Seamless integration to other PeopleSoft applications

INVOICE AUTOMATION FOR PEOPLESOFT

Leverage the benefits of both worlds with Basware Invoice Automation for PeopleSoft

Basware Invoice Automation is a highly automated and easy-to-use system for managing and controlling your organization's invoice handling process. It enables a fully automated process from data capture and review & approval to transfer for payment.

Realize unparalleled ROI from existing PeopleSoft Enterprise Applications

Feature-rich solutions based on best practices provide unparalleled returns on existing investments by extracting value from PeopleSoft applications with no custom development required.

Save money via discount capture with automated matching

Versatile business rules based matching enables timely capture of discounts, letting you use the discount management model of choice. Matching of contract-based and other non-PO invoices delivers best-in-class operations and processes.

Oracle partnership offers best of both worlds

Basware is an Oracle Certified Partner as well as an Oracle Partnership member and has developed standard interfaces to all three leading Oracle ERP suites. This certification offers Oracle users the assurance that Basware Invoice Automation applications integrate seamlessly with Oracle business solutions. Basware has access to the newest developments in the Oracle business environment and can offer the latest integration methods as they become available to Oracle customers including Oracle Fusion middleware.

Seamless integration through standard Oracle interfaces

Basware's anyERP is an off-the shelf adapter that, when combined with Basware's Invoice Automation solution, enables PeopleSoft users with a fully traceable and highly automated invoice processing. The adapter includes all components necessary for a transparent and reliable interface scenario. Master data such as supplier details, GL code combinations, exchange rates and tax codes will be imported to the Basware system through scheduled updates, using direct access to the PeopleSoft database or database views.

Supplier invoices are received in electronic format (XML, EDI, etc.) or as paper invoices after which they will be scanned and captured in the Basware solution. Purchase order-based invoices are automatically matched against purchase orders from the PeopleSoft eProcurement system. Invoices that match within the set tolerances need no further action and can be directly transferred to PeopleSoft for payment by the Basware anyERP connector. The posting of the invoice to PeopleSoft (vouchering) is either done automatically when a match occurs and the coding is copied from the PO to the invoice or manually for a minority of exceptions.

Non-matching order-based invoices or 'orderless' invoices will be routed for approval in Basware Invoice Automation. Workflow rules and authorization levels can be based on PeopleSoft DOA hierarchy or other approval register settings.

Integration Facts

SEAMLESS INTEGRATION WITH PEOPLESOFT ENVIRONMENTS

- Seamless integration with PeopleSoft Enterprise Applications, all Oracle platforms such as Oracle e-Business suite, and with JD Edwards World, OneWorld and Enterprise One
- Support for all standard PeopleSoft integration points and APIs, Fusion and webservices
- Support for Multiple PeopleSoft or mixed ERP environments (Oracle and other ERPs)

ADDED VALUE TO ORACLE USER COMMUNITY

- Easy-to-use interface adapted to needs of different roles in invoice handling process
- Rapid deployment and integration to PeopleSoft
- Ability to re-use existing PeopleSoft-built logic
- Get up-and-running quickly with Basware's PeopleSoft expertise and resources
- No custom development needed in PeopleSoft
- Utilize existing PeopleSoft integration procedures

INVOICE AUTOMATION FOR PEOPLESOFT

Fusion integration with PeopleSoft - An easy, fast and proven way to boost Accounts Payable performance in PeopleSoft environments

With Basware Invoice Automation, managers and invoice reviewers will receive an email notification when action needs to be taken. With Basware's web application or Mobile Client, they can check, comment on and approve invoices anytime, 24/7.

Basware offers unique multi-dimensional business rule based data validation, early detection of exceptions, and matching of invoices to purchase orders, contracts or any predefined payment schedule. Invoices matched or approved during the authorization process are loaded into PeopleSoft Accounts Payable via standard open interfaces and webservices. No PeopleSoft customization is required.

The vendor payment terms will be transferred from the Vendor Master to Basware, ensuring a closed loop audit trail from invoice arrival to payment.

The Basware Image Viewer provides a direct link between PeopleSoft and Basware during the entire invoice life cycle. It allows for direct access to the invoice image, data and status information of invoices when working within the PeopleSoft environment.

The Basware anyERP integration platform ensures a tight and controlled connectivity with the organization's backend system during the entire invoice handling process. This bi-directional interface provides clear validation reports and allows for swift error handling when needed.

With over 100 world-class organizations using Basware solutions in conjunction with their Oracle applications, Basware Invoice Automation is a safe and proven choice for business process optimization to the Oracle community.
